

Living In A 3 D World: The Full Tour

We'd love to take you on a tour of our world. A world of diversity, difference and disability, a world we celebrate with this image. So, the tour: at the very center of the world you see two hands making a sign, this is the ASL sign for 'together'. This beautiful sign expresses the goal and the sentiment of the image. Now take a look into the picture, you will see a little boy wearing a blue tee shirt with Braille on it. This is the Braille character for 'people'. Again, reflecting that we are all 'people' in this together. Follow around and you will notice a woman sitting down with her arms crossed over her heart. It's not difficult to interpret the ASL sign for 'love'. Around the circle you will notice differences in ethnicity, disability, age and faith groups. Looking closely you will also see an 'non-traditional family,' two moms and a son.. On the outer ring you will find a variety of places of worship, a variety of cultures and topographies along with both rural and urban living spaces. Living in '3D' is about all of us, people, living and 'loving,' all of us 'together'. Welcome.
